Overview

CRUD operations

Import data

Sequelize methods

API endpoints

Generate Sample Data

Create Method

findAll Query Method

findAll()

Query for all records. Filter using 'where'.

findById Query Method

findById

```
User.findById( '55' )  
  .then( rows => {  
    res.json( rows );  
  })  
  .catch( ...  
  )
```

Update Row

Update

```
User.update({ name: 'Joe', password: '123' },  
  { where: { id: req.params.id }  
})  
  .then(rows => {  
    res.json(rows);  
  })  
  .catch(...  
))
```

Delete Row

Summary

CRUD

- Create, Read, Update, Delete

Methods

- create, bulkCreate
- findAll
- findOne
- update
- destroy
